

Quality Policy

Document Number: MES-DOC-236

Quality Policy

Management and Engineering Services, LLC is committed to being a leader in all activities within our community, as well as in providing products and services to our clients, regardless of where they may be located and the types of products and services provided. Our commitment goes beyond conformance and compliance and is based on a holistic approach to providing the highest quality service possible. We are fully committed to ensuring that we are fully aware of our responsibility for providing quality work products and services, and will implement and sustain a quality management system based on the international standard ISO 9001.

Our *Quality Policy* is a critical element of our quality management system and will be used to make decisions at all levels. Our policy will be made available to all employees, consultants, service providers, and the general public. It will be addressed in employee orientations and refresher trainings. Through our quality management system and our employees and consultants, we are committed to providing a framework for setting quality objective and goals, the continual improvement of our quality management system, the satisfaction of our clients, and an awareness of all applicable regulatory obligations and requirements. This policy replaces all prior quality policies as of the date of approval. We will review this policy at least annually and more often as may be necessary to ensure it is current and accurate.
